

MDF Designs, LLC, owner of CareZips®, Announces Patent Approved

Atlanta, February 19, 2015 - MDF Designs, LLC, a national provider of the innovative healthcare product known as CareZips®, today announced the application for the patent of its new, original, and ornamental design for manufacture has been approved by the US Patent & Trademark Office and issued on January 27, 2015. The unique frontal opening and closure in the unisex trousers, branded as CareZips®, is produced via a strategic partnership with Encompass Group, LLC, a leading manufacturer and marketer of reusable textiles, disposable and single use medical products and professional apparel. <http://www.carezips.com>

About CareZips®

CareZips® is a unisex 3-zipper trouser that allows for an easier and more dignified change of the adult brief, care of abdominal wounds and catheter bags in the elder population or any person with a temporary or permanent disability caused by injury or disease. This is a new, one of a kind product to dignify the handling of adult incontinence. The trousers are beneficial to the home health work force, nurses, CNS, and general caregivers. The adult is less exposed. Shoes and socks do not have to be removed. CareZips® make for a happier adult and less back strain for the caregiver.
